

THE UNIVERSITY OF AZAD JAMMU AND KASHMIR, MUZAFFARABAD

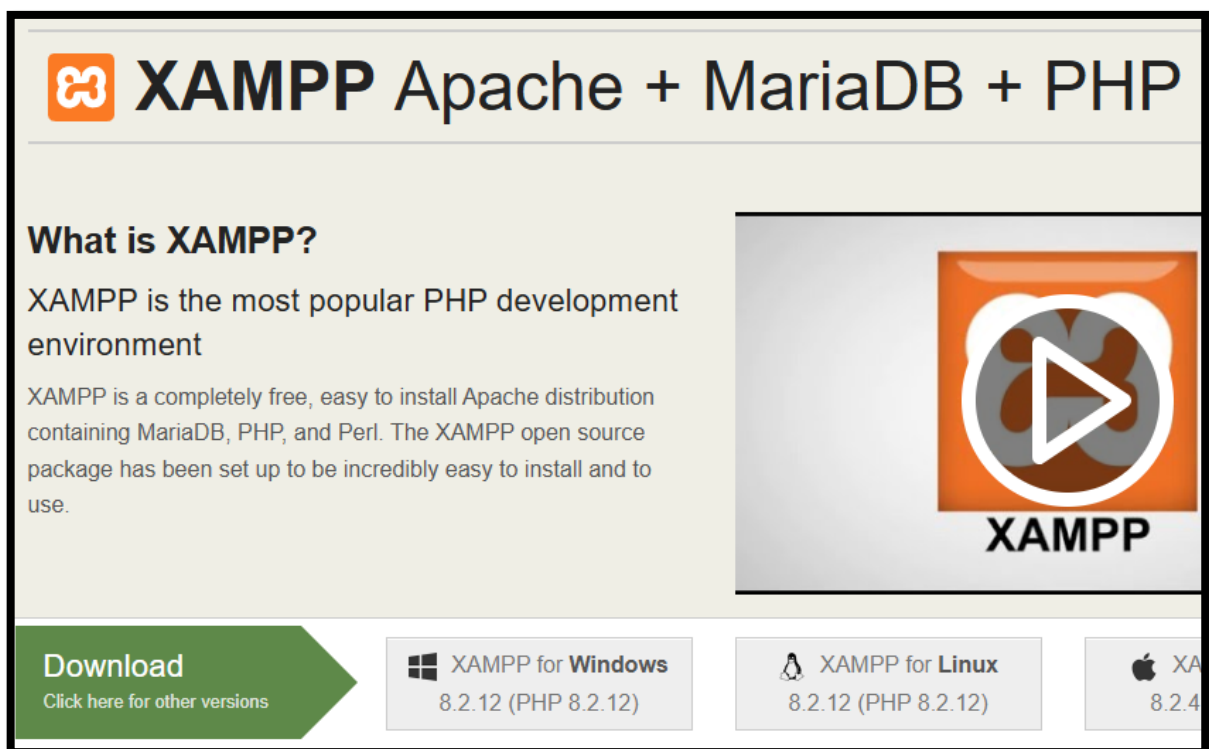

COURSE TITLE	Database Systems
COURSE CODE	CS-2204
LAB TITLE	Installation of XAMPP server
STUDENT NAME	MAHDI ALI NAHVI
STUDENT ROLL NUMBER	2024-SE-16
INSTRUCTOR NAME	Engr. Awais Rathore
SUBMISSION DATE	September 20, 2026
LAB NUMBER	01

1. Objective

To download, install, and configure XAMPP to run a local Apache web server and MySQL database environment.

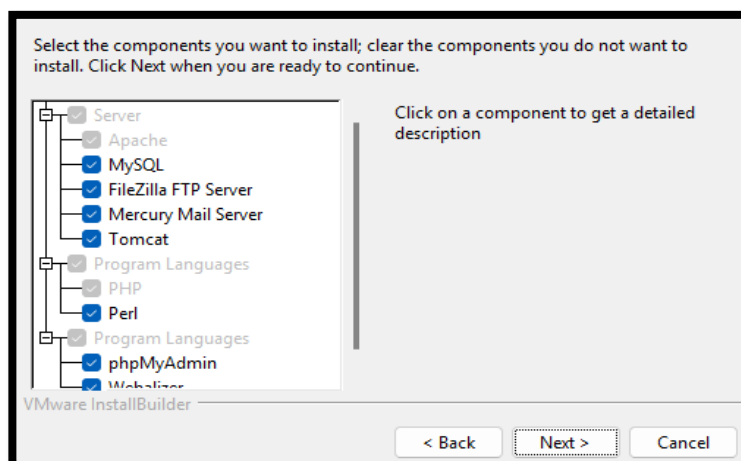

2. Downloading XAMPP

I navigated to the official Apache Friends website and downloaded the latest version of XAMPP for Windows.

3. Installation Process

During the installation, I ensured that the core components, specifically Apache and MySQL, were selected.

4. Starting the Services

After installation, I opened the XAMPP Control Panel. I clicked the "Start" buttons for both Apache and MySQL. The module backgrounds turned green, indicating the services are running successfully on their default ports (Apache on 80/443, MySQL on 3306).

Modules									Netstat
Service	Module	PID(s)	Port(s)	Actions					Shell
☐	Apache	23836 16032	80, 443	Stop Admin Config Logs					Explorer
☐	MySQL	26216	3306	Stop Admin Config Logs					Services
☐	FileZilla			Start Admin Config Logs					Help
☐	Mercury			Start Admin Config Logs					

5. Verification (phpMyAdmin)

To verify the database engine is working, I opened my web browser and navigated to <http://localhost/phpmyadmin>. The graphical interface for MySQL loaded successfully.
